Art Unit: 1724

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14 and 20-23, drawn to a filter in combination with a fuel cell, classified in class 429, subclass 12.
- II. Claims 15-19, drawn to a fuel supply, classified in class 210, subclass 251.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are independent and distinct from one another because the filter of Group I does not require an outer casing containing fuel, as does the fuel supply of Group II (see claim 15, line 2); and the fuel supply of Group II does not require a perfluorinated sulfonic acid polymer medium that is substantially similar to the polymer exchange membrane in the fuel cell, as now required by Group I (see claim 1, last two lines; and claim 20, line 4).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

In addition to the above restriction requirement, an election of species is also required. This application contains claims directed to the following patentably distinct species of the claimed invention:

- (A) filter location species (e.g. fuel supply, electronic device, mixing chamber, byproduct chamber, etc.); and

Art Unit: 1724

(B) polymer medium form species (e.g. shredded, ingots, nonwoven web, woven web, powder, etc.).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed filter location species **and** a single disclosed polymer medium form species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 7, 14 and 20 appear to be generic.

Applicant is advised that a reply to this requirement must include: (1) an identification of the species that are elected consonant with this requirement; and (2) a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, Applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, Applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should Applicant traverse on the ground that the species are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1724

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
